

FDA Warning Label

FDA would like to simplify the warning label on tanning beds. Here is the current proposal developed by FDA, which closely mirrors the IEC Warning Label:

WARNING: Ultraviolet radiation may cause:

- *injury to the eyes and skin*
- *skin aging*
- *skin cancer*
- *Read instructions carefully*
- *Wear protective eyewear (goggles) provided*
- *Certain medicines and cosmetics may increase sensitivity to ultraviolet radiation.*

^ ^ ^ ^ ^

ITA Revision

ITA has suggested the following revision to FDA's proposal:

WARNING: Ultraviolet radiation may cause:

- *injury to **unprotected** eyes*
- *skin aging*
- *skin cancer*
- ***Avoid overexposure***
- *Read instructions carefully*
- ***Wear federally compliant eye protection intended for use with this device.***
- *Certain medicines and cosmetics may increase sensitivity to ultraviolet radiation.*
